Fuji Electric FA Europe – Solution for Drives

Fuji Electric FA Europe introduces the new frequency inverter for lifts, Frenic Lift.

Over the years Fuji Electric FA has collected a know-how of inverters for lift applications, this know-how has resulted in a new inverter developed especially for lift applications and the high standards this require.

Fuji Electric FA has with Frenic Lift already a large market share of the lift industry in Spain and this has helped to develop and improve the inverter, which is now available for the entire European lift market.

The inverter offers many possibilities and as all Fuji Electric FA products a very high quality. Frenic Lift is one of the best inverters currently on the market for lift applications.

Frenic Lift offer;

- Speed control accuracy: $\pm 0.01\%$
- Rise time: 300 μ s
- 200% of rated current for 10 s
- Inverter from 5.5kW to 45kW
- 3 ph 400V

And much more.
